DEVELOPING A LEARNING TECHNOLOGY PLATFORM FOR THE PROFESSIONAL DEVELOPMENT OF THE EUROPEAN DENTAL TEAM

PhD Candidate: Tarik Shembesh

Email: t.shembesh001@unibs.it

XXXI cycle

Tutor: Prof. Corrado Paganelli & Prof. Patricia Reynolds

Background

The dental team is encouraged to engage in continually professionally development as a team however there is currently no system or platform in place to collate evidence for th team to facilitate the process that is quality assured and accredited.

Objectives

Breakdown the structural and financial burden in team based accredited quality assured continual professional learning, teaching and practice collaboratively in order to efficiently improve patient outcomes

Methodologies

Action research methodology

Expected Results and Impact

Establish the theoretical, educational & professional basis for the development of a quality assured platform that is quality assured and has the potential for accreditation across the European union.
